

Naso room manager

Room booking and beyond

Meet Naso room manager

We believe that great design is when simplicity meets functionality at a point of minimalism where everything you need is available. This digital room booking system gets rid of double bookings, confusion on where to go and meetings that get interrupted. Naso room manager takes care of room booking so you can focus on productive meetings.

Cloud hosted

Easy installation without need to setup local servers. Updates are installed easily thanks to the cloud.

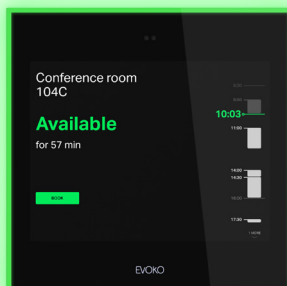

Scalable solution

Adapt the solution to your needs, add more sophisticated features with extended room services.

See room status at a glance

A room booking system should be more than a list of features. We believe it must be easy to use and that it should look sublime in any office. Naso room manager rocks our trademark intuitive light signals to guide you to the right room and clearly see the room status from a distance.

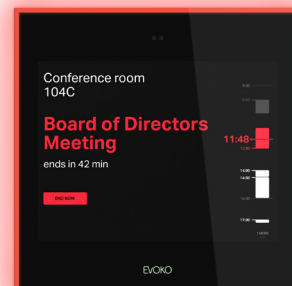

AVAILABLE

BOOKED WITHIN
10 MINUTES

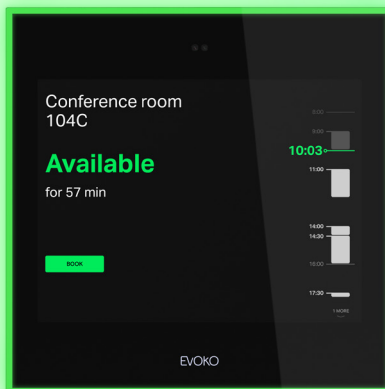

BUSY

A new level of intuitive user interface

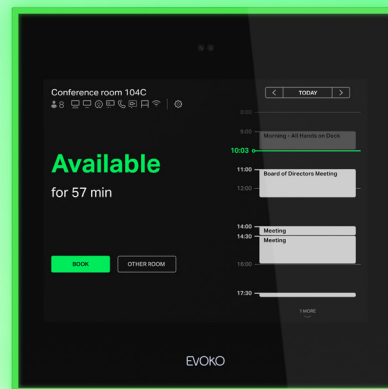

Naso room manager has a built in proximity sensor that unfolds a new layer of information as you approach the screen to show you everything you need to know. Use the touch screen to quickly find a room for your spontaneous meetings. Small icons represent the room's equipment so you can pick the rooms that serve your needs. You can also report broken or missing meeting equipment directly on the screen.

DISTANT VIEW

Room name, status and current time shown in a larger font.

CLOSE VIEW

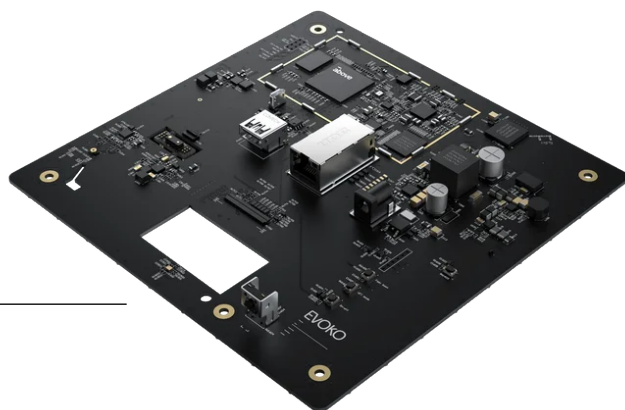

Detailed view with access to action buttons.

Built from the ground up

Naso room manager is a purpose built room manager. We have designed the software and hardware from the ground up to ensure a best-in-class experience.

Dedicated hardware and software with enterprise

SPECIFICATIONS
